

# Tricuspidalklappe: The Forgotten Valve

Donnerstag, 15. August 2019

**Referenten: Prof. Raban Jeger, Prof. Oliver Reuthebuch**

### Take home messages

- High-risk patients with high perioperative surgery
- Open issues: Indication, patient selection, imaging, assessment of outcomes
- Individual decision on treatment and modality
- Transcatheter tricuspid therapy is feasible with different techniques – their clinical efficacy is still to be determined
