Current Concepts of Chest Wall Stabilization and Reconstruction

5th Basel Workshop
November 4th – 5th 2021

Dear Colleagues

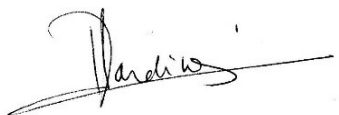

It is our great pleasure to invite you to the 5th Basel Workshop on Current Concepts of Chest Wall Stabilization and Reconstruction

We will again focus on rib fixation and on surgical management of sternum fractures. We will also discuss indications and practical aspects of chest wall resection and reconstruction. A second part will be the presentation of interesting cases with focus on indications and the timing of operation.

In this context we present the 3 most frequently used systems in this field and give the opportunity to the participants to become familiar with the different techniques. We will have the honor to share the expertise and the support of outstanding international experts.

Finally we will have the unique chance to practically test all systems in the Anatomical Institute of the University of Basel.

Register now, we are looking forward to welcome you in Basel,

Prof. Didier Lardinois
Head of Department of Thoracic Surgery

Dr. Aljaz Hojski
Consultant of Department of Thoracic Surgery

Scientific Program

November 4th

2.15-4.30 p.m.

Part 1, Current State of the Art, technical aspect Surgical Stabilization of Flail Chest and Fixation of Rib Fractures:

Indications and results

D. Lardinois 40 +10 min.

Osteosynthesis of the sternum:

Indications and Techniques in Fracture and Dehiscence

S. Schulz-Drost 40 +10 min.

Chest Wall Resection and Reconstruction:

Indications and practical Aspects

P. Filosso 40 +10

4.30-5.00 p.m.

Coffee break

5.00-6.30 p.m.

Part 2, Presentation of interesting Cases:

Indication and Timing for Operation
(Faculty and Participants)

6.20 p.m.

Closing remarks day 1

Dinner

November 5th

8.00-10.00 a.m.

Introduction to the different Fixation Systems DePuySynthes® EuroprismeMedical®, and MedXpert® Presentation and Demonstration of the Techniques of Rib and Sternum

Fixation and Reconstruction of the Chest Wall

(G. Massard, P. Moreno de la Santa, S. Raab, S. Schulz-Drost, P. Thomas, P. van Huijstee)

10.00-10.30 a.m.

Coffee break

10.30 a.m.-3.30 p.m.

Part 3, Practical Part Practical Handling of all Systems for each Participant in Anatomical Institute

10.30 a.m.-0.15 p.m.

Sternum Fractures

0.15 -1.15 p.m.

Lunch

1.15 - 3.30 p.m.

Rib Fractures and Chest Wall Reconstruction

3.30 - 4.00 p.m.

Closing remarks and evaluation
